BUSINESS and PROFESSIONAL EXPERIENCE

BETA Services, Inc.
President and CEO

Blakeslee, PA
1994 - Present

President, CEO and Senior Consultant of BETA Services, Incorporated, an Information Systems Consulting company providing information system support and development services. Specializing in Legacy System support for IBM mainframe system based clients and Sungard OmniPlan / OmniPlus support services.

Geary Corporation
Manager, Resident Support Services

Pittsfield, MA
1988 - 1994

Responsible for 25+ Programmer/Analysts providing 24 hour a day, 7 day per week development and application support for a multi-billion dollar international manufacturing corporation. Provided programming and operational support for client's Cost Systems such as Price Variance, Standard Cost, Material Usage, Cost of Sales, Average Margin and Physical Inventory.

Crane & Company
Programmer/Analyst

Dalton, MA
1986 - 1988

Provided technical and analytical support in a multi-site, pulp and paper, distributed processing manufacturing environment. Primary duties consisted of financial system consulting, programming and implementation.

Geary Corporation
Manager, Technical Services

Pittsfield, MA
1983 - 1986

Installed and supported mainframe hardware and software platforms for both employer and corporation clients including systems programming, international telecommunications networks, site operations support and technical education.

Sprague Electric Company
Manager, Corporate Technical Services

North Adams, MA
1968 - 1983

Managed Corporate Technical Services department providing hardware, software, communication and office automation support for a multi-national electronic component manufacturer. In addition to supporting the corporate data center, responsibilities included establishment, coordination and support of hardware and telecommunication platforms used in the corporate-wide distributed processing network including budgetary responsibility and capital planning and control. Prior positions included Systems Programmer and Manager of Systems and Programming for financial systems.

Vincent S. Moderski, CDP

Recent Contracting Assignments

Mellon (sub-contract with CGI-AMS)

Tele-commute

September – December 2004

Provided support services to off-shore testing staff for OmniPlan to OmniPlus conversion and OmniPlus PTF installation testing. Analyzed current production application requirements, identified common interfaces and prepared application test plans and testing JCL. Researched and resolved testing issues.

TIAA-CREF

Charlotte, NC

May - June 2004

Data Flow analysis of interfaces between client legacy systems and new vendor supplied software. Provided Level 0 and Level 1 data flow diagrams and end-to-end process flows.

Prudential Investments (Prudential Financial)

Moosic, PA

January 1995 - June 2001

Provided analysis, design and coding for a vendor-provided Defined Contribution (401k, 403b) Pension Administration system. Database consisted of over 4000 plans and one million participants. Platform was multiple IBM mainframes running OS/MVS/JES2 and VM/CMS, COBOL-II, VSAM, CICS, DB2 and other proprietary software, using SunGard's OmniPlan / OmniPlus as the main record keeping system.

General Electric Plastics

Pittsfield, MA

April 1994 - August 1994

September 1997 - Present

Perform analysis, design, coding and maintenance of a client-based Standard Cost system and related information systems. Platform is an IBM mainframe running OS/MVS/JES2 and COBOL, IDMS, VSAM, DB2 and EASYTRIEVE. Provided Year 2000 conversion support. Source programs are controlled using Endeavor for both online and batch systems.

General Electric Specialty Chemicals

Morgantown, WV

January 1996 - April 1996

Provided analysis and maintenance of a client-based Standard Cost system. Designed and coded batch and online programs, and modified job streams to allow for local data preparation without disrupting daily processing cycles of other company units. Platform was an IBM mainframe running OS/MVS/JES2 and COBOL, IDMS, VSAM, DB2 and EASYTRIEVE.

Kay-Bee Toy Stores

Pittsfield, MA

September 1994 - December 1994

Performed analysis, maintenance and coding of client-based retail distribution systems. Platform was an IBM mainframe running OS/MVS/JES2 and COBOL-II, DB2, VSAM and CICS.
